

RADIATION CONSULTANCY

✓ WHO WE ARE

Dosel specializes in providing qualified expert medical physics advice to organizations to ensure that owners of medical radiation are at the forefront of safety and compliance.

We combine practical and cost effective solutions to ensure compliance with your regulatory obligations.

✓ SERVICES OFFERED

■ Licensing

Management & Possession licensees and Users have legal obligations to comply with the conditions of their license and the appropriate Code of Practice. Dosel provides you and your employees with technical advice and our automated web based platform MyRSO to keep on top of your Radiation licensing requirements.

■ Radiation Management Plans

Dosel can develop your Radiation Management plan for all modalities including General X-ray, Fluoroscopy, Angiography, CT and Mammography and ensure all employees review your Radiation Management plan and understand their responsibilities when working with your Radiation apparatus.

■ Radiation Safety and Laser Safety Training

Dosel's MyRSO platform provides animated training for you and your staff. No more boring power point presentations that contain too much physics which you don't understand. Our training videos simply the complexity of Radiation safety and protection.

■ Shielding Design Reports and Certification for X-ray & Lasers

Dosel can design your x-ray or operating theatre to minimise cost whilst still maintaining maximum protection to staff and members of the public in adjoining areas. Our qualified staff are accredited in all Australian State jurisdictions to design, determine the level of shielding in your existing rooms and certify your radiation rooms across all modalities including;

- ✓ Diagnostic X-ray (All modalities)
- ✓ Nuclear Medicine & PET
- ✓ Radiotherapy

■ Incident Reporting & Dose calculations for;

- ✓ Incorrect & Pregnant Patient imaging
- ✓ Misadministration of Radioactive Isotopes
- ✓ High Dose notifications

■ Compliance Testing

Our experienced compliance testers are accredited in all Australian States for Equipment and Premises testing of all modalities;

- ✓ Diagnostic X-ray
- ✓ Nuclear Medicine & PET
- ✓ Radiotherapy

■ Technical Advice & Reporting for;

- ✓ PPE and Eye Dose modelling
- ✓ Personal Dosimetry & Report reviews
- ✓ Dose Reference Levels and most other Radiation Safety Protection or Regulatory issues
